

IHH Sustainability Focus

Patients

Empowering our patients

We focus on delivering **better, faster, more convenient, and transparent care** through a variety of initiatives that range from striving for better clinical outcomes to empowering patients via **innovation** and technology and safeguarding **data privacy**.

People

Shaping the best place to work for

We enhance our programmes and policies to foster a safe culture and workplace environment that prioritise **employee total well-being**, that nurture **diversity and inclusion**, and that **continuously engage and develop** our people to bring out the best in them.

Public

Nurturing a healthier society

We focus on tackling **antimicrobial resistance, reducing disease burden** through health literacy and screening (for cancer and cardiovascular diseases), enhancing **emergency preparedness**, and **making quality healthcare accessible** to underserved communities through free or subsidised treatments.

Planet

Protecting our planet

We are progressively advancing in **environmental stewardship** by focusing on waste and water management, reducing our carbon footprint through energy efficiency projects, bolstering **climate resilience**, and integrating sustainability into our supply chain management practices to ensure responsible sourcing and operations.

SUSTAINABLE DEVELOPMENT GOALS

The Sustainable Development Goals (SDGs) were adopted by the United Nations in 2015 as a universal call to action to end poverty, protect the planet, and ensure that all people enjoy peace and prosperity. At IHH, we focus on the SDGs that make most sense to our business and where we can make the largest contribution, particularly with SDG3, Good Health and Well-being.
